

Year 6 Autumn 2 2025

English

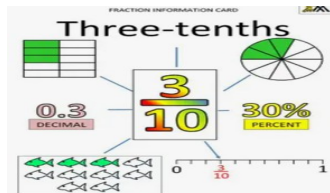

Our English lessons we will be focussing on 'Portal stories'. Year 6 will explore what a portal is and plan their own story which includes a portal story.

In non-fiction they will be looking at 'Explanation texts' where they will explain 'How to survive in the Land of Roar'

Maths

We will be focusing on fractions, decimals and percentages. Regular practice of SATs arithmetic papers and sample questions from the Reasoning papers will help the children become familiar with the style of questions they will face in these papers and will allow staff to identify areas needing additional support.

Please support us in encouraging the use of TTRS and Stick n Split to learn all multiplication facts with your child. We aim for every child to access TTRS each and every week.

Computing

The children will be evaluating websites this half term. They will think about the purpose of websites and the intended audience. After evaluating, they will then create their own web pages. Their peers will then evaluate the websites and see if improvements need to be made. Each computing session will also focus on staying safe online'. For example, children will discuss what 'fake news' is

Oracy

Oracy is a vital part of the Year 6 curriculum. This half term the children will focus on commentating and debating. Developing Oracy skills allows our learners to become confident speakers.

YEAR 6

Geography

In Autumn 1 we had lots of History, now it is time to fully flex our Geography muscles. We will be looking at trade and how much we depend on trade for our daily lives. We will focus on what we import, export and fair trade.

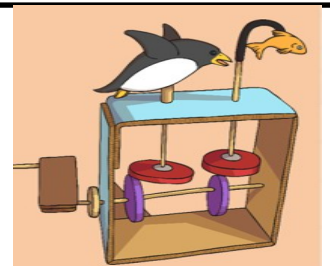

Class Novel and guided reading

In our class novel is the wonderful portal story 'The Land of Roar'. We will also practise answering SAT style questions on a range of fiction and non-fiction texts linked to our other subjects.

Design technology

This is our first DT unit of Year 6 and we are very excited. The children will become designers and then makers! They will be designing and making Automata toys. We will final evaluate their finished product

Science

The children will be learning about 'light' this half term. This links to Autumn 1 where they learned about Electricity. They will use their investigation skills to think of scientific questions about 'light'. They will then plan experiments and draw conclusions from their results.
