

Year 6 Summer 2 2024

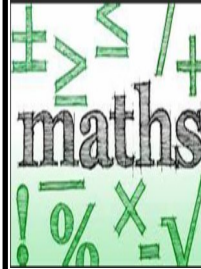

Based on the set text "Red", our English lessons will initially focus on using all our acquired knowledge to create a suspenseful fairy tale. personal copy of the book to keep. As well as reading the story, we will use the text as a stimulus to learn more about the plight of refugees through our English, maths and geography lessons. This transition unit will be continued by the Year 7 staff in Bradford secondary schools in September.

In Geography, we will be learning about local fieldwork. We will also link to our Boy 87 project as we will learn about Eritrea and other countries that refugees flee.

In Art, we will be looking at the work of David Hockney. We will evaluate his work and what we think of it. The children will also use their sketching skills to replicate a selection of his work.

In preparation for secondary school, we will continue to revise all aspects of the Year 6 curriculum; we will consolidate our arithmetic skills and apply our knowledge to problem solving and reasoning questions.

We will undertake wider mathematical projects and investigations (such as designing and "running" a theme park).

In computing, we will be focusing on computer programming. This will involve understanding algorithms and coding.

This half term is very exciting as the children will take part in Outdoor Learning. This will take place in the Forest School and will be a nice change of environment from the classroom.

The children will focus on working in teams and building up their resilience and communication skills.

In RE, we will continue to discuss how people express their beliefs. We will consider how people worship and represent their religions through music, symbols, clothing and art.

We will continue our school focus on oracy—how we talk and listen to each other. We will use our talk rules in every lesson and make sure we use our sentence structure starters.

In PE, we will ensure that our children continue to remain as healthy and active as possible. We will develop our athletic abilities in preparation for Sports Day taking part in activities such as relay races and the long jump. This half-term we will also all enjoy the fantastic activities and equipment available through our Healthy Schools Week.

Please ensure that children read regularly (ideally every night) and that they use Times Table Rock Stars and Spelling Shed to practice their Maths and English skills

Most importantly, this half term, pupils and teacher will be liaising with secondary schools in order to ensure a smooth transition to Year 7.
