

Year 6 Spring 2 2024

English

We will be writing our own 'warning stories' where a character puts themselves in danger.

Later in the half term, we will use the book 'The Promise' as inspiration for considering ways to improve our local area and writing letters to local figures to try to persuade them to help us.

Maths

In Maths, we will begin by learning about 2D and 3D shapes and then using these to measure perimeter, area and volume.

We will also learn about angles; calculating missing angles and measuring angles using a protractor.

We will continue to complete weekly arithmetic tests to aid them in preparation for the SATS.

Art

This half term our topic is printing. We will be looking at the work of some well known 21st Century artists: Keith Haring, Favianna Rodriguez and Andy Warhol. We will then create our own printed art pieces inspired by these artists.

Geography

We will be focussing on migration – types of migration and why people migrate. We will learn about what it means to be a refugee, and how the UK and Bradford has been affected by migration. We will also consider how climate change impacts migration.

Science

Our topic for this half term is Scientific Investigations. We will learn scientific skills as we plan and carry out our own investigations from designing scientific questions, making predictions, measuring and observing, to collect data, interpreting data and drawing conclusions to answer our hypotheses.

Class Novel

This half term's class novel is 'Can You See Me?' This wonderful book tells the story of Tally who is an 11 year old girl who has recently been diagnosed as being autistic. We will read how she faces the challenges of starting secondary school, friendships and family life. The children will also continue to practise answering SAT style questions each day to check their understanding.

RE

In the lead up to Easter, we will learn about what Christians believe about Jesus' death and resurrection. We will learn why Easter is such an important festival for Christians all over the world.

Computing

Our topic is spreadsheets. We will learn how to enter data into a spreadsheet and then use simple formula to carry out calculations. We will use spreadsheets to plan an event, answer questions and evaluate their results in comparison to questions asked.
