

# Year 4 Autumn 2 2024

## English

In our English lessons, we will begin with a fiction unit based on our class novel - 'Agent Asha'. We will be focusing on story structure, character descriptions, speech and dialogue. Our second English topic will be writing and 'performing' new scripts on a current event.

## Science

This half term we will be exploring Sound. Learning how the ear works, how sounds travel and then how pitch and volume changes. We'll be experimenting with how sound changes. Building on our previous knowledge of particles we will explore how sounds travel through different materials.

## Guided Reading

During this half-term's guided reading lessons, the children will continue to explore a variety of both fictional and non-fictional texts. Themed poems will also be included to strengthen inference skills. This exploration will further develop the children's comprehension skills and strengthen subject knowledge in other areas of the curriculum. As mentioned, a new class novel book will be introduced to continue practising their understanding.

## Maths

In Maths lessons, we will be focussing on multiplication and division this term. We will be learning how to multiply and divide numbers by 10 and 100. We will also learn how to multiply and divide our 6, 7 and 9 times tables. The children's times table knowledge is very vital as it will help them understand how to multiply and divide 2 and 3 digits by one digits. The children will also be practising all their times tables to get them ready for our mock times table test in December.

Geography - In Geography, we will be learning about the fact that this great country is very diverse and has something for everyone. We will be learning how to use a compass and taking a tour around the regions of this great country of ours. By the end of the unit, children will be able to speak confidently about where they would like to visit and why.

## R.E

In RE, we will be focusing on Islam. We will be learning about the five Pillars of Islam and how Muslims apply these pillars into their daily lives and how using the five pillars can lead them to having a good life.

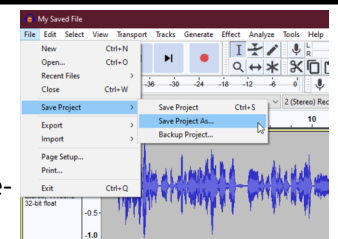

## French

In French, the children will be looking at core vocabulary and revisiting previously learnt French. This will be completed alongside 'Je Me Presente', meaning Presenting myself.

## Computing

In our computing lessons, the children will be creating their own podcast through audio production. They will have to successfully record sound using a device, import other sounds and evaluate their audio by playing it back. Through recording, combining and layering audio, the children will have something to listen back to and assess.

## PSHCE

Our year group focus this term will be around the book *The Grand Hotel of Feelings* where we will discuss the different emotions we feel, how to manage the emotions and how to know label the emotion we are feeling.
