

## Reception Autumn 2

### Drawing club

We will be continuing to look at a variety of different books this half term, including some seasonal ones closer the Christmas break. Please speak to your child about the story which we are focusing on each week and encourage them to share the new vocabulary with you.

### How to help your child at home

These are a few things to help your child with:

- Recognise their own name
- Put on their own coat and zip it up
- Talk to your child about their day and encourage them to speak in full sentences, not just one word answers.

### Phonics

We are continuing to work on Phonics each day. The children have been regularly assessed and are making progress with their phonics. The children are streamed into groups according to their assessments and they will continue to be assessed throughout the half term. Some children will continue to bring home the sheets like before. Please ensure they are completing them at home.

### Maths

This half term we will be focusing on numbers 0-5, being able to recognise the numbers and being able to count the correct amount according to the digit.

We will work on this until we feel the children have got a deep understanding of the numbers and can represent the digits in a variety of ways.

### The World

This half term we will be looking at a variety of different celebrations which are celebrated by different religions around the world. This includes Diwali, Remembrance Day etc.
