

## Worksheet 4

Dividing by 5

P123

1 Write the missing numbers.

- (a) Ruby has 30 beads.  
She uses 5 beads to make a ring.

$$\square \div \square = \square$$

Ruby makes  $\square$  rings.

- (b) 45 sweets are divided among 5 pupils.

$$\square \div \square = \square$$

Each pupil gets  $\square$  sweets.

- (c) There are 50 marbles. Charles put them equally in 5 bottles.

$$\square \div \square = \square$$

Charles puts  $\square$  marbles in each bottle.

- (d) There are 15 pupils. Their teacher wants them to stand in groups of 5.

$$\square \div \square = \square$$

There are  $\square$  groups of 5.

P124

- (e) There are 40 pencils. Elliott keeps them equally in 5 cases.

$$\square \div \square = \square$$

Elliott puts  pencils in each case.

- (f) Holly buys 25 apples. She puts them in bags of 5.

$$\square \div \square = \square$$

Holly has  bags of apples.

P125

- 2 Match.

$$10 \div 5$$

$$20 \div 5$$

$$35 \div 5$$

$$50 \div 5$$

$$45 \div 5$$

$$15 \div 5$$

$$\bullet \square 9$$

$$\bullet \square 7$$

$$\bullet \square 2$$

$$\bullet \square 4$$

$$\bullet \square 3$$

$$\bullet \square 10$$

P126

## Challenge

I bought 56 apples from the grocers shop.

Find as many ways as you can to divide them into equal groups.

Use counters to help!
